Greetings From the Fair Board:

Greetings From the Fair Board

Welcome to the 116th edition of the Roseau County Fair. The fair continues to grow and improve with each year. As a board we believe our fair is one of the best county fairs in the state

We have a full line up planned for the grandstand, starting with Church Night at the fair on Sunday July 16th, put on by the Roseau area ministerial association. Tuesday night will feature the Northern Pullers Tractor Pull, this event was rained out last year and we are hoping for good weather so the guys can show off their classic tractors. The tractor pull will have multiple classes including farm, improved and super classes of vintage tractors with weight classes from 3,500 lbs. to 9,500 lbs. Wednesday night is the always crowd pleasing Wojo's Rodeo with a full rodeo. Thursday is the eighth year of Bush car races that keeps growing in both drivers and spectators. Friday is the fan favorite demolition derby.

Free entertainment will include a return appearance of Crazy Contests from Freddie Prez, which will have contests for all ages and great prizes at every show. The Otter Adventure Water show will be at the fair with shows three times per day and the otters will be on display between shows. Both of these acts will be north of the soybean play area. Strolling the grounds will be Max Power a 9-foot tall 5-foot-wide robot decorated with extensive LED lighting. MAX walks, talks, dances, and more - creating an instant party wherever he shows up! The power wheels derby will have qualifying rounds on Wednesday, Thursday and finals before the demolition derby in front of the grandstand. Returning to the fair after a couple years off is Annandale laser tag which will be located just south of the midway

Our head of maintenance Jim Mack and his assistant Avery Eidsmoe have been busy making improvements across the grounds. With 25 buildings on the fairgrounds, it takes a lot of time just to keep up on all maintenance on all these different buildings. Through a Minnesota Department of Agriculture grant we were able to buy new goat pens along with replacement sheep pens which will make it much easier for exhibitors to get animals in and out of pens and create more eye appealing display of the animals. We are also replacing the lights in the dining room of the 4-H building with new LED lights and also replacing and updating counters for the 4-H food service.

The fair board has adopted the following policy on pets:

With the exception of service animals or animals approved as part of an exhibition, pets are not allowed on the fairgrounds during the Roseau County Fair.

This policy was adopted to lessen problems with barking dogs near the livestock exhibits. This policy is consistent with other county fairs and the Minnesota state fair. Be aware service animals are only dogs or mini horses that are trained to do a specific task for a person with a disability. Service animals are not emotional support animals of any type.

The Fair board is proud of the events we put together for the 2023 fair and we will continue to present the best fair possible for Roseau County residents. Hope to see you all at the fair!

Remember, make fair week, vacation week!

Livestock or poultry known by the exhibitor to have an infectious communicable disease or to have been exposed to

Therefore livestock affected by these diseases cannot be exhibited. A statement from a veterinarian that an animal is being treated for these diseases is not acceptable.

All livestock will be **inspected** by the Official Veterinarian on the opening day of the exhibition and daily during the exhibition. The Official Veterinarian will order the immediate removal to a quarantine facility or removal from the exhibition premises of any livestock with symptoms of infectious or communicable diseases. Animals placed in a quarantine facility must remain there until removed from the exhibition premises. They may not enter a show ring. This includes livestock with warts and ringworm.

All **testing** must be conducted prior to the exhibition and a record of the test results on a test chart or Intrastate Health Certificate must accompany the tested animals. All animals imported into Minnesota for exhibition must be accompanied by a certificate of veterinary inspection and satisfy Board of Animal Health importation requirements.

Livestock and poultry entered in a petting exhibit are not exempt from the exhibition rules if the animals are from more than one farm or there are other animals at the exhibit.

The 4-H Blue Ribbon Auction Sale has been a longstanding tradition and educational opportunity for the Roseau County 4-H youth involved in 4-H livestock projects. 4-H Blue Ribbon Auction sales throughout Minnesota share three strong goals:

1. To recognize the commitment, work and expense involved in market animal projects.
2. To reward excellence in the commitment and work put forth by the 4-H youth and their project.
3. To give members a real life experience of selling their animal - completing the project cycle.

Banks and businesses who have not participated and may be interested in this awesome opportunity to support agricultural experiences for youth in Roseau County should contact the University of Minnesota Extension/4-H, Roseau County office at 218-463-1052 for more information.

PREPARATION OF FRUITS & VEGETABLES FOR EXHIBITION

•**Snap Beans:** Harvest before constrictions appear between seeds, when seeds are about half grown. Ends of pods should not be broken off in picking. Pods should be uniform. Pods may be wiped clean, but not washed.

•**Beets, Carrots, Parsnips, Turnips, Rutabagas:** Root crops should be mature, but not overgrown, pithy or coarse in texture. Tops should be trimmed to 1 1/2" above crown. Side roots should be trimmed off, but not the top root. Roots can be washed but not scrubbed.

•**Broccoli:** Heads should be dark and purplish green and compact. Avoid yellow flowers in head. Leave on about a 5" stem.

•**Cabbage:** Cut stem about 1/2 inch below the head. Remove blemished or broken leaves, but take care not to peel the heads too much. A few outside wrapper leaves are desirable. Specimens may be washed.

•**Cauliflower:** Heads should be white, compact and free of small leaves and ricy texture. Cut stems to leave 4 to 6 leaves. Outer leaves should be trimmed to 1 or 2 inches above the white head. Use a soft bristled brush to remove dirt.

•**Celery:** Remove roots of stalk and trim butt to form a triangle or pyramid. Trim diseased and broken leaves on the outside until green color is uniform.

•**Sweet Corn:** Select ears that are well filled out to the tip. Kernels should be milky and juicy. Remove outer husks, but allow a short shank and the inner husks to remain.

•**Cucumbers, Pickling:** 3-5 inches long. Specimens should be the same stage of maturity and uniform in size, shape and color.

•**Cucumbers, Slicing:** Select specimens that are straight and dark green; about 6-10 inches long. Specimens should be uniform in size, shape and color.

•**Leaf Lettuce:** Display plants with roots. Wrap in moist paper put in plastic bag or foil.

•**Kohlrabi:** Roots should be removed just below the ball. Remove all but the upper 4 to 6 leaves. Select specimens that are a uniform medium size and not hard or woody. Skin should be easily punctured by the thumbnail. Specimens should be clean, but not washed.

•**Onions:** Specimens should be mature and thoroughly cured. The neck should be small. Do not peel to give a slick appearance. Only outer scales that are broken or discolored should be removed. Small basal roots should be left intact, but trimmed to a uniform length. Wipe or brush clean, but do not wash.

•**Potatoes:** Tubers should be uniform in size, shape and color. Washing is permitted, but unwashed, clean potatoes are preferred.

Be careful not to blemish the skin by scrubbing. Avoid specimens with defects or disease.

•**Rhubarb:** Select specimens that are straight, uniform and unblemished. Stalks should be pulled from the plant, not cut. Trim leaf blade to 1 inch above the stalk.

•**Summer Squash:** Select small to medium size fruits when the rind is soft and easily punctured with a thumbnail. Leave about 1/2" stem and wipe fruits clean.

•**Winter Squash and Pumpkins:** Select mature specimens when the rind resists the pressure of the thumbnail. Each should be free of defects. Leave stems attached.

•**Swiss Chard:** Select plants that are fresh, crisp and have bright green leaves. Trim off roots and trim butts to a pyramid shape. Trim off diseased and broken leaves on the outside until color is uniform.

•**Tomatoes:** Select fruits that are uniform in size, shape and color. Remove stems. Fruits should be perfectly shaped and free of cracks and blemishes.

No greenhouse grown produce allowed to exhibit. Outdoor grown only accepted.

Product

Time & Method of Processing

Date Product was Canned

All canned goods must indicate processing time and method according to most current publications from University of Minnesota Publications. Please check with the Minnesota Extension Service.

A) All low-acid products must be processed in a pressure canner. Low-acid foods have pH values higher than 4.6. They include red meats, seafood, poultry, milk, and all fresh vegetables except for most tomatoes. Most mixtures of low-acid and acid foods also have pH values above 4.6 unless enough lemon juice, citric acid, or vinegar is included to make them acid foods.

B) Acid foods have a pH of 4.6 or lower and must be processed in a boiling-water bath canner. They include fruits, pickles, sauerkraut, jams, jellies, marmalades, and fruit butters. Although tomatoes usually are considered an acid food, some are now known to have pH values slightly above 4.6. Therefore, if they are to be canned as acid foods, these products with unknown pH must be acidified to a pH of below 4.6 with lemon juice or citric acid. Properly acidified tomatoes are acid foods and can be safely processed in a boiling-water bath.

C) Jams and Jellies require 2 piece lids.

Acidification: To ensure safe acidity in whole, crushed, or juiced tomatoes, add two tablespoons of bottled lemon or lime juice or ½ teaspoon of citric acid per quart of tomatoes. For pints, use one tablespoon bottled lemon or lime juice or ¼ teaspoon citric acid. Acid can be added directly to the jars before filling with product. Add sugar to offset acid taste, if desired. Four tablespoons of vinegar with 5 percent acidity per quart may be used instead of lemon juice or citric acid. However, vinegar may cause undesirable flavor changes.
